Professional Summary

Senior Software Engineer with 10+ years of experience designing and delivering scalable backend systems in finance, cloud, and enterprise environments. Oracle Certified Java Professional with deep expertise in Java, Spring, distributed systems, and cloud platforms.

Strong track record of building high-performance applications, improving system reliability, and delivering business-critical solutions. Continuously expanding expertise in systems programming (Rust, Zig, C/C++) with a focus on DSA (Data Structure and Algorithms) and modern cloud-native technologies.

Core Skills

- **Languages:** Java, Scala, Go, Python, JavaScript
- **Frameworks:** Spring, Apache Camel, Kafka, React
- **Cloud & DevOps:** AWS, Kubernetes, Jenkins, Docker
- **Data & Storage:** Oracle, Snowflake, MySQL, DynamoDB
- **Testing:** JUnit, Cucumber, Gatling, Karate
- **Other:** ETL, Microservices, CI/CD, Distributed Systems

Education & Certifications

- **BSc Computer Science** – Faculdade Anhanguera (2015)
- **Oracle Certified Professional – Java SE 7** (2016)
- **Specialization in Software Architecture** – DeVry Metrocamp (2016)
- **Business Intelligence & Data Science** (2021)
- **Programming in C++** (2023)
- **Google Go Programming** (2023)
- **Functional Programming in Scala** (2018)

Professional Experience

Analog Devices

Senior Software Engineer | Sep 2026 – Present

- AI Studio: platform to speed up teams inside the organization.

Technologies: JavaScript, Python, Docker, DynamoDB, AWS

Fidelity Investments

Senior Software Engineer | Feb 2024 – Aug 2026

- Development of a replacement system for after-tax financial modeling
- Building scalable backend services within Post Trade systems
- Improving system observability and reliability using monitoring tools

Technologies: Scala, Spark, Java 17, Spring, Kafka, AWS, Snowflake, Oracle

---

HPE (Hewlett Packard Enterprise)

Cloud Engineer (GreenLake) | Sep 2023 – Feb 2024

- Developed backend services integrating multiple HPE platforms into a unified support portal
- Enabled seamless customer interaction across services (support, devices, cases)
- Integrated AI-powered search capabilities

Technologies: Go, Kubernetes, AWS, Jenkins, New Relic

Fidelity Investments

Senior Software Engineer | Jun 2020 – Apr 2023

Electronic Trading & Fixed Income Systems

- Built backend services for automated trading pipelines
- Ensured secure and reliable order processing via ETL pipelines
- Developed CI/CD pipelines and performance testing frameworks

Salesforce Platform

- Delivered new features using Salesforce Lightning and backend integrations

- Built AWS Lambda services for scalable integrations

Technologies: Java, Spring, Kafka, AWS, Salesforce Apex, Jenkins

---

Airboxlab / Foobot (Luxembourg)

Senior Backend Developer | Dec 2019 – Jun 2020

- Developed IoT backend systems and ETL pipelines
- Improved system performance and scalability in AWS environment

Technologies: Java, Scala, Python, AWS, MySQL

Devoteam (Luxembourg)

Java Developer | Oct 2018 – Jun 2019

- Delivered banking solutions for Société Générale
- Worked across backend, frontend, and database layers

Technologies: Java, Spring, React, Oracle

---

e-Spatial Solutions (Ireland)

Java Developer | Dec 2017 – Sep 2018

- Built GIS-based systems for the Irish Department of Agriculture (LPIS)
- Customized spatial data solutions for government use

Technologies: Java, Oracle Spatial, GIS.
